If the problem persists or you are not sure which software is having problems, install . DLL file directly to Windows. Register dll file by using Microsoft Regsvr Copy the file to C:\Windows\System32\ You can install the .dll file in both system folders without any problems. To complete this step, you must run the command prompt as an administrator. Open the Start menu, and before you click anywhere, type cmd on your keyboard. Right-click the Command Prompt search result and click the Run as administrator option. Paste the following command into the command-line window that opens, and press Enter key. %windir%\System32\regsvr32.exe vcruntime140_app.dll vcruntime140_app dll is a DLL system file that is provided to my Microsoft for Windows 7, Windows 10, and earlier versions. Sometimes this file may be broken or missing from your computer, in which case, when you start a program, program, or game, vcruntime140_app.dll will be loaded from System32 or SysWOW64 Folder, and you will be prompted for an error message. Having a missing vcruntime140_app.dll can cause error messages from applications such as Origin, Wireshark, or Games like GTA 5, Minecraft, and PubG that may contain the following messages: The application cannot start because vcruntime140_app.dll is missing from your computer. Try reinstalling the application to resolve this issue. vcruntime140_app.dll is either not designed to run on Windows, or it contains an error. There was a problem vcruntime140_app.dll. The specified module Failed to load vcruntime140_app.dll. The specified module could not be found. There are several possible fixes for this error: Delete the application, application, or game that is causing this error and reinstall it. Look for possible Windows updates if possible, update the program, program, or game that causes the error to the latest version Clean and Optimize Your Registry (with CCleaner) Download vcruntime140_app.dll and Copy/Paste it into the application, program, or game folder (Sometimes applications only use DLL files from the directories) Recommended: Download and install vcruntime140_app.dll You can download and install vcruntime140_app.dll for free on Windows 10, Windows 8, Windows 7 and Windows XP. Vcruntime140_app.dll is considered a type of Dynamic Link Library (DLL) file. Dynamic Link Library files, like vcruntime140_app.dll, are essentially a guide to storing information and instructions for executable (EXE) files - like Setup.exe - to follow. These files were created so that multiple applications (e.g. CyberLink Media Suite) can share the same storage of valuable memory allocation, which makes your computer run more efficiently. Unfortunately, what makes DLL files so convenient and efficient also makes them extremely vulnerable to problems. If something happens to a shared DLL, whether it is missing or being corrupted in any way, it may generate a runtime error message. Runtime is quite self-explanatory; it means that these errors are triggered when vcruntime140_app.dll is attempted to be loaded either when CyberLink Media Suite is starting up, or in some cases already running. Some of the most common vcruntime140_app.dll errors include: Address access violation - vcruntime140_app.dll. Vcruntime140_app.dll could not be found. Cannot find C:\Program Files\WindowsApps\Microsoft.VCLibs.140.00_14.0.27810.0_x86__8wekyb3d8bbwe\vcruntime140_app.dll. Cannot register vcruntime140_app.dll. Cannot start CyberLink Media Suite. A required component is missing: vcruntime140_app.dll. Reinstall CyberLink Media Suite. Unable to load vcruntime140_app.dll. The application has failed to start because vcruntime140_app.dll was not found. The file is vcruntime140_app.dll missing or corrupt. This application failed to start because vcruntime140_app.dll was not found. Reinstalling the application may resolve this issue. Your vcruntime140_app.dll file could be missing due to accidental deletion, uninstalled as a shared file of another program (shared with CyberLink Media Suite), or deleted by a malware infection. Furthermore, vcruntime140_app.dll file corruption could be caused from a power outage when loading CyberLink Media Suite, system crash while loading vcruntime140_app.dll, bad sectors on your storage media (usually your primary hard drive), or quite commonly, a malware infection. Thus, it is important to make sure that your antivirus is kept up to date and scans regularly. Erros relacionados ao vcruntime140_app.dll podem surgir por diferentes razões diferentes. Por exemplo, um aplicativo defeituoso, o vcruntime140_app.dll ter sido excluído ou perdido, corrompido por software malicioso presentede no seu PC ou umm registro danificado do Windows. As mensagens de erro mais comuns são: O programa não pode ser iniciado porque está faltando vcruntime140_app.dll no seu computador. Lit reinstalá-lo para resolver esse problema. Houve umm problema na inicialização do vcruntime140_app.dll. Não foi possível encontrar o módulo especificado. Erro ao carregar vcruntime140_app.dll. O módulo especificado não pôde ser encontradoNão foi possível localizar o ponto de entrada do procedimento * na biblioteca de vínculo dinâmico vcruntime140_app.dll Não foi possível localizar o número ordinal * na biblioteca de vínculo dinâmico vcruntime140_app.dll vcruntime140_app.dll não foi projetado para ser executado no Windows ou contém umm erro. Tente instalar o programa novamente usando a mídia de instalação original ou contate o administrador do sistema ou o fornecedor do software para obter In the great of the cases, the solution is to install vcruntime140_app.dll on your PC correctly to the System folder in Windows. Alternatively, some applications, especially PC games, require the DLL to be placed in the game/program installation folder. For detailed installation instructions, see frequently asked questions.
